EDUCATION

- **Bachelor of Engineering in Computer Science & Engineering (AI & ML)** *2024 – 2028 (Expected)*
Chandigarh University, Punjab GPA: 7.8/10.0
 - **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Software Engineering, Database Management Systems, Computer Networks, Object-Oriented Programming, Web Technologies
 - **Certifications:** IBM-Certified Coursework (AI & Full-Stack Development)

EXPERIENCE

- **Core Team Member** *2024 – Present*
CodeChef Community *Chandigarh University*
 - Contributed to UI/UX design and website management, supporting a platform used by 500+ active students.
 - Designed 20+ posters, visual assets, and event branding materials for coding contests and workshops.
 - Assisted in maintaining visual consistency across platforms, improving engagement across social and web channels.
 - Supported website updates and handled traffic during community events with 100+ concurrent users.

PROJECTS

- **TwinTalk AI – Personalized Communication Assistant** *Ongoing*
Technologies: React, Vite, Tailwind CSS, FastAPI, MongoDB
 - Developing an AI-powered messaging assistant that generates replies mimicking a user’s personal communication style using chat history analysis.
 - Designed a tone control system (formal, casual, mixed) for context-aware message generation.
 - Building a full-stack architecture with FastAPI backend for AI processing and React frontend for interactive UI.
 - Structuring scalable modules for chat data processing, style learning, and response generation.
 - Implementing a “Human vs AI” game mode to evaluate realism of generated conversations.
- **Multilingual Voice-Enabled AI Assistant for Web Navigation *SIH / Tekathon***
Technologies: FastAPI, React, FAISS, Gemini API, LangChain, Speech-to-Text, Text-to-Speech, Docker
 - Implemented RAG (FAISS + Gemini) pipeline for context-aware responses from institutional documents.
 - Designed an intent recognition system to map user voice queries to website navigation actions.
 - Enabled multilingual voice interaction using STT + TTS with automatic language detection.
 - Built a multi-level fallback system (RAG → external search → human support) for reliability.
 - Deployed FastAPI backend with React frontend and PWA support for cross-platform access.
- **[Blue Inc.](#) – Personal Portfolio Website**
Technologies: HTML, CSS, JavaScript, React, Figma, Vercel
 - Designed and developed a fully custom personal portfolio website from scratch, end-to-end.
 - Crafted UI/UX with a focus on visual identity, consistent design language, and smooth interactions.
 - Deployed on Vercel with a custom brand identity (Blue Inc.) and responsive layout across all screen sizes.
 - Showcases projects, skills, and design sensibility – built to reflect real-world frontend and design capabilities.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript

Frontend: HTML, CSS, React

Backend: Python (FastAPI), Node.js (Express)

Database: MongoDB

Tools & Design: Git, GitHub, Figma, Canva

Other: Full-stack Web Development, UI/UX Fundamentals, Website Management
